

## **Bowenfels Medical Practice**

### **Lithgow NSW**

An excellent opportunity has become available in our practice for a Full or Part Time General Practitioner. We also encourage doctors who have an interest in hospital based VMO medical or procedural work. Lithgow District Hospital has also recently become the principal rural teaching campus for the Notre Dame University medical school.

Bowenfels Medical Practice is located just past the Blue Mountains nestled in the valley of Lithgow. We are the longest established practice in the area with a large patient base.

The practice has 2 surgeries which are modern, computerised and fully accredited. Practice nurses are available to assist GP's with a full range of services.

Bowenfels Medical Practice has fostered a collaborative medical team with good employee relations. We strive to create a good environment to work in.

Lithgow has a population of approximately 20,000 people. Offering a modern rural lifestyle and in close proximity to the city, it makes an attractive place to live.

Please email your interest and CV to Jannine De Veau, Practice Manager:
